Professional Summary:

Software QA Engineer with 3+ years of experience across quality assurance, software development, and cybersecurity in AI-driven, banking, and fintech environments. Skilled in end-to-end testing, AI/ML validation, and identifying critical defects to ensure reliable and high-performing systems. Strong knowledge of SDLC, test methodologies, and automation tools, with proven ability to collaborate with cross-functional teams to analyze requirements, resolve complex issues, and enhance overall product quality.

Work Experience:

Software QA Engineer

Inteliweave (An Umbrella Company of AIDocBuilder Inc) | Feb 2025 – Present

- Participate in requirement analysis and test planning, initiating early test case design.
- Design and execute functional, regression, and exploratory test cases for AI-driven applications.
- Conduct API testing and generate automated reports to improve validation efficiency.
- Identify critical AI/ML-related defects and collaborate with developers to resolve them.
- Contribute to AI/ML model improvement using datasets and documentation.
- Lead QA efforts for AI-powered projects, coordinating the execution of 300+ test cases and delivering stable, high-quality releases with no critical production issues.

Associate Cyber Security Architect

Global Brand PLC | Jun 2023 – Feb 2025

- Conducted security assessments and vulnerability analysis
- Analyzed client requirements in banking and fintech projects
- Collaborated with teams to validate system behavior and compliance
- Supported solution design and technical documentation
- Resolved complex system issues and technical roadblocks, improving system stability and performance

Junior Software Engineer

Byte Trek Ltd. | Jan 2023 – May 2023

- Assisted in development and testing of web applications
- Debugged issues and improved system performance
- Supported QA testing and validation
- Developed ERP system for HR and admin operations
- Built a reputation management system for client feedback tracking

Skills:

- **Testing:** Requirement Analysis, Test Planning, Test Case Design, Test Execution, Defect Tracking, Root Cause Analysis
- **Automation, API & CI/CD:** Selenium, Playwright, Postman, Newman, CI/CD Pipelines
- **Performance & Security:** JMeter, Nmap
- **Tools & Database:** Jira, GitHub, MySQL
- **Programming:** Python, Java
- **Concepts:** SDLC, OOP
- **Systems & Environment:** Linux Command Line
- **Soft Skills:** Communication, Teamwork, Problem-Solving, Adaptability, Decision-Making

Professional Training and Certification:

1. SQA & Cyber Security Training — IT Training BD
2. Software Testing Bootcamp — Udemy

Education Qualification:

BSc in Computer Science — BRAC University

CGPA: 3.35 / 4.00 | 2018–2022

HSC (Science) — Rajshahi Govt. City College

GPA: 5.00 / 5.00 | 2015–2017

SSC (Science) — Seroil Govt. High School

GPA: 5.00 / 5.00
